OTHER SIZES CAN BE CUSTOM MADE TO ORDER (FOR SALE ONLY)  
 ALL PRICES F.O.B. N.Y.C.

The screen comes in a rectangular shape and then is stretched by attaching drape hooks, knobs, black trick line and knob collars to create a three dimensional and bat wing effect. No cutting or shaping is necessary.

## CRYSTAL VISION STRETCH SCREEN

To serve a new and sophisticated demand of the audio visual and related fields, "Crystal Vision Stretch Screen" has been created and developed for a new "in look" in front projection screens. Its concept and application create a new dimensional involvement by the viewing audience, by wrapping them in a cocoon of AV Stimuli.

**Crystal Vision Screens** have been used with great success in recent presentations by AT&T, Coca Cola, NCR, Standard Oil and the American Film Institute Cinema Spectacle. It is currently used as the screen media for the "San Francisco Happining," a pilot for a chain of multi media theatres.

**Crystal Vision Stretch Screen** has been perfected after extensive fiber research and dye process to create embossed crystal fabric cells to reflect clear, sharp, brilliant images. The light is distributed and defined evenly over the nylon and antron material.

Screens of all sizes are available for purchase. The sewing and fabrication process employs a unique stretch stitch, which improves the grain tensile strength of the fabric and retains maximum elasticity and stretch. Portability is easy, as screens can roll up into a groovy carrying bag. A rigging kit with full

instructions is included, when required. Stock size screens can be rented nominally, when available.

It is worthy to note that other fabrics, materials and equipment are available to create total environments, in conjunction with people, projection, sound, lighting and special effects, for outstanding results.

**Coming Soon!**—A pale blue color tint to ease viewing of black and white images and to provide a high resolution screen for microfilm, architectural and engineering drawings, charts and sketches, and TV and electronic sketches.
